

# THE GLEICHEN CALL

VOLUME XXVIII

NO. 2

GLEICHEN, ALBERTA, WEDNESDAY

MARCH 28, 1934

SUBSCRIPTION \$2.00 PER YEAR

## M. D. OF BLACKFOOT COUNCILLORS HOLD MEETING

The Blackfoot municipal councillors held their third meeting for this year recently and transacted considerable business before they finally adjourned. Councillors Nelson, Wheatley, Edinger, Deschamps, Umbreit and Thorsen were present.

The secretary reported that returning officer, P. Ogier, had advised him that Mr. J. B. Deschamps had been elected councillor for division No. 4; Mr. R. P. Umbreit for Division No. 5 and Mr. T. A. Thorsen for Division No. 6 of the municipality and that these three gentlemen had subscribed to their oath of office.

Councillor Thorsen was appointed reeve for the ensuing year. Councillor Umbreit deputy-revee. Messrs. Deschamps, Nelson and Umbreit were appointed the finance committee. The legislative committee will consist of Messrs. Wheatley, Bollinger and Thorsen. Councillors for divisions 1, 2 and 4 were appointed a committee to settle disputes in connection with damage claims at the pound situated on S. E. 28-23-22. Councillors for Divisions 3, 5, and 6 are a committee to settle claims at the pound situated on S. W. 22-28-22, and councillors for Divisions 4, 5, and 6 will be a committee to settle claims at the pound situated on S. E. 20-24-23.

The same method of employing medical health officers as in previous years will be continued for the present year. The council will also constitute a board of health with the reeve as chairman and the secretary treasurer will be the secretarial work. Each councillor will be an executive officer of the board to look after health matters in his division.

A resolution was passed that the regular monthly meetings of the council will be held on the second Tuesday of each month beginning at 10 a.m. in the municipal office unless such time and place is changed by resolution of the councillors.

The councillors heartily approved of the Gleichen District Agricultural Association's endeavor to stage a Standing Field Crops Competition in 1934 and assure them of the co-operation of the council.

A number of lots will be offered for sale by auction, on Tuesday June 12. These lots are on plan 6753 AD, Gleichen.

Coun. Wheatley carried a motion: That upon condition arrears of taxes are paid in full on or before the first day of May, 1934, that we give the same discounts that were given in the year 1933 under the Tax Consolidation Act of 1931.

The council also passed the necessary by-law to provide for the issue of seed grain for the coming season to extremely necessary and urgent cases, and the amount shall not exceed \$5,000.

By-law No. 5 to provide for extermination of agricultural pests, weeds and provisions and points raised.

Coun. Umbreit moved and carried: That the secretary circulate all farmers and advise that said by-law No. 5 provides that every person in the municipality shall take active measures to destroy all animal, gopher, pests upon land owned, occupied, leased or controlled by him or her and further point out that the most effective results are secured by March and April poisoning.

Mr. Keith acting deputy minister department of public works, letter was read regarding the Hrusar-Calgary highway. He was unable to give a definite reply as to construction for the coming season, inasmuch as estimates have not been passed by the legislature.

A carload of sawdust is to be ordered and arrangements made for a suitable place to store it. The Council also decided to recommend to the Field Crops Commissioner that free freight be authorized for three cars of oats to Gleichen.

A surprise party was given Miss I. McBean one evening last week, at the home of her parents where she had been holidaying. There was a large number of friends present from Nanaimo and Skeena districts. The evening was spent at cards and dancing until well into the following morning. A. Bremner accompanied by M. S. Waters of Nanaimo provided the music.

## AGRICULTURAL ASSOC. SPONSORING CROP COMPETITION

The Provincial Field Crops Competition will be sponsored again this year by the Gleichen District Agricultural Association. Final arrangements were made on Saturday afternoon in the offices of Messrs. MacCallum & Sutermeister where the following executive and members met: Messrs. F. Daw, M. Bollinger, J. Bollinger, A. P. MacCallum, K. H. McFlave, R. S. Mackay, J. E. Ostrander, D. McLeod, J. Thomas, N. T. Furell, John Boyd and C. W. Harrison.

The special committee appointed in charge of this competition consists of F. Daw, J. A. MacCallum and J. Bollinger.

It was decided to sponsor the May 24th celebration and to hold a special meeting on April 21st for the final arrangements. A request from the local ball club to move the grand stand was granted with D. L. McLeod, J. Bollinger and J. E. Ostrander in supervision of the moving.

John Boyd and J. E. Ostrander are to interview the town of Gleichen regarding payment on the grounds.

## MISCELLANEOUS SHOWER

A miscellaneous shower was given in honor of Mrs. Floyd Sammons, a bride of this month, on Tuesday afternoon, at the home of Mrs. W. J. McKeever. An interesting program was arranged by Mrs. C. O. Nelson, consisting of songs, readings, and contests. Mrs. J. A. McArthur won the contests.

The house was prettily decorated with pink and green streamers, the bride and groom doted which centered on dining room table was beautifully dressed by Mrs. O. E. Calkins and Mrs. P. Bushman. The bride received many useful and beautiful gifts for which she thanked the donors. Miss Hazel Robison and Miss Charlotte Barnes assisted the bride in getting the parcels.

A dainty lunch was served by Mrs. Elder, Mrs. McKeever, Mrs. Day, Miss Robison, Miss Burns as helpers. Among those present were: Mrs. A. Wilson, Mrs. R. J. Barnes, Mrs. A. Quinnell, Mrs. E. Walker, Mrs. J. Hutchison, Mrs. McDowell, Mrs. Calkins, Mrs. C. Nelson, Mrs. B. McMillan, Mrs. Bell, Mrs. H. Burns, Mrs. W. Cunningham, Mrs. V. Green, Mrs. R. Green, Mrs. J. Grant, Jr., Mrs. Lois Elder, Mrs. J. H. Sammons, Mrs. C. Rousche, Mrs. Erford, Mrs. Yule, Mrs. Stott, Mrs. J. A. McArthur, Mrs. Day, Mrs. A. McLeay, Mrs. L. Rousche, Mrs. P. Warner, Misses M. O. Desjardine, Hazel Robison, Charlotte Barnes, Isabelle Wilson and Lois Rousche.

The Blackfoot Indians enlisted the town to a considerable extent Monday. Most of them received money of various amounts due them from the Indian department.

Mr. D. Henderson of Champlain, who has been visiting here parents here, Mr and Mrs. W. Cook, for the past week returned home Sunday.

## HOPE TO COVER TENNIS COURTS WITH ASPHALT

A movement is on foot to have two asphalt tennis courts laid in Gleichen during this coming spring. The approximate cost of the two courts would amount to about \$400. An offer has been made to Manning W. Sutermeister to have these two courts completed and maintained providing at least twenty five members could be secured for a membership fee of \$8 each. At this surprisingly low fee, any tennis enthusiast should be pleased to subscribe since he then would have the prospect of playing on perhaps the best type of courts available anywhere and be absolutely free on any worries regarding the cat-casting etc. It is also the intention of organizing an inter-town club including Brooks, Gleichen, Bassano and Strathmore. If this is done, in all probability representatives would be chosen to represent the district in the provincial play-offs during the summer.

A list of signers has been started and is open to anyone interested at the offices of Messrs. MacCallum & Sutermeister. In the event that not sufficient signatures can be obtained to proceed with the construction of asphalt courts, the courts will be maintained in good condition as ender courts and the membership fee will be held at \$3.50 per member. This fee is in all probability the only fee set and will place everyone on an equal footing.

Special tickets may be made available for privileges of playing in the forenoon only. This will depend largely on the demand for same. Any information regarding tennis activities for 1934 can be obtained from the manager of the tennis courts. It is very important that all interested in asphalt tennis courts for this summer sign the petition as soon as possible.

## THE WEEK AT OTTAWA

(By F. W. GERSHAW)

We lack the gear lever which will link the machinery of production through universal joints to the differential of consumption which will set in motion the wheels of progress. It is hoped that the Central Bank will manage monetary affairs that some progress will be made towards supplying this lack.

The revision of the Bank Act was postponed one year to allow the Royal Commission to make a report of the whole banking and monetary problem. Thirty six countries of the world now have central banks. They act as the depositories of government funds. Government business is conducted on such a large scale as to seriously derange the money market unless steps are taken to prevent it the inflow of revenue causing scarcity and the paying out of the interest payments causing easiness of money.

The central bank must be a people's bank, must ensure that credit and note issue is controlled not for private profit but for public interest.

Interest. The objective of price control in Canada would be the smoothing out of the peaks and valleys of our price history.

There are many factors, e.g., psychology, etc., concerned but the controlling factor is "the purchasing power of money and credit carries inversely with the quantity in circulation." "A country requires the amount of money in circulation that will keep prices stable."

Canadian bankers have not been concerned about the amount of money in circulation.

Sweden is a country similar to Canada as it is off the gold standard, exports timber, produces food supplies and has no money market. With a government owned central bank they tried: 1st. In the interests of public confidence to keep prices from going too high, and 2nd. To arrest the long standing downward trend. Weekly valuation and extensive records were kept to the price levels. They could not control the volume of money as there was no money market. They confined their efforts to interest rates.

The Midland Bank Monthly says of Sweden: "It can be said that the internal purchasing power of the money unit has been kept partly by the deliberate action of the central bank." In view of this experiment an author reports: "Balancing the evidence available it seems fair to conclude that in general, at least, control of money and credit is possible, that prices can be regulated to a very profitable degree and that very extensive social advantages can be realized by such control."

As soon as the Bank of Canada is established all chartered banks must turn over all the gold they have at the value of 20.87 per ounce.

The note issue privileges will be withdrawn from the chartered banks gradually, five per cent each year for five years, ten per cent yearly for another five years, in all 75 per cent to be withdrawn in 10 years.

Canada officially reduces its gold coverage from 40 per cent to 25 per cent. This gives the Central Bank enormous powers of inflation.

The new Bank of Canada notes will be legal tender. Canada officially goes on the gold bullion standard. Bank of Canada notes will be redeemable in gold but not in smaller quantities than a bar containing 400 worth at present \$13,000.

## SAVINGS COULD BE MADE

These days many people are busily engaged in making out their income tax returns and undoubtedly in many cases curbs words are flying around in the near vicinity—causing the government because there is such a law on the statute books—in fact causing everything in connection with the operation of the law, more especially for having piled loose some few dollars which the cunning individual feels as though he should retain for his own use and let the other fellow carry the load.

Of course, not all taxpayers are as pictured above. Some, in fact the big majority, recognize the fact that money must be raised from some source for the carrying on of the

government, and they are willing to assume their fair share of this load through payment of the income tax.

There are many willing and unwilling tax payers who are agreed on the one question, however, and that is that government, as it is being carried on in Canada, both federal provincial and municipal, is getting to be rather an expensive proposition, and it would seem that those in power are not trying very hard to reduce the costs, except through the cutting down of wages, which is only a mere gesture in comparison to what might be done if a really honest attempt was made to reduce costs.

Some day Mr. Common Man will wake up to the fact that he is being taxed and re-taxed for the purpose of keeping professional politicians in a fat job, and when they do wake up to this fact government will be put on the same basis as a private business. However, as long as Mr. Common Man will stand for the present mismanagement of his government, business the politician will see that he pays through the nose.

Mrs. M. Rousche, Mr. O. Desjardine and family were Sunday visitors to the country, at the home of Mr. and Mrs. C. Rousche.

Mr. and Mrs. A. Maynard were recent visitors at Midnapore, where they visited a sister of the former. Mrs. G. Allist accompanied them as far as Calgary. Mr. Maynard, Sr., also went on to Midnapore.

Good Friday being a holiday, all places of business in town will be closed. No doubt many will avail themselves of the excursion rates being offered by the railways, and take a trip somewhere.

Every now and then some man complains that he cannot get business because times are bad. Or occasionally, the times are very good and there seems to be plenty of business and there is no use in hustling for it. Of course, the business conditions of the times have something to do with the amount of business that person gets. A statistician, however, has figured out that the difference between good times and bad times is only ten per cent of business. Observation has shown that in bad times the men who get business are the ones who are on the job, who are at it early and late, who devise schemes and render services that are worth while. The best times are between eight o'clock in the morning and five in the afternoon.

## Expert Handling of Water

I am still on the job for surveying and making ditches, cuts, fills and laying out plots, for irrigation, hay grounds, and any kind of advice cheerfully given.

WALTER E. ANGLIN

## DESIGN FOR LIVING

## An Exhibition Of Childhood

London is to witness a most unique exhibition when, on April 16, will open a display of relics of "Children throughout the Ages", acclaimed as the most comprehensive portrayal of child life down the centuries ever presented to the public. The event derives significance as much from the historic value of the various exhibits, as from the purpose to which the proceeds are to be devoted. The beneficiary will be one of London's most deserving charities.

The relics to be displayed link child life with the dim remote ages of the past, the oldest exhibit being a Chinese doll said to date from 600 B.C. From that far distance down the years, the varying fashions of children, the toys which brought them pleasure, the garments they wore, the furniture which decked their nurseries and playrooms, all will be traceable in the array of exhibits from the pre-Christian era down to the end of the reign of Queen Victoria.

Queen Elizabeth's christening robe, her cap and mittens, a portrait of her as a baby (by Holbein), will be on show. A shirt worn by Charles I. as a child of two, his boyhood's brocade coat, will find prominent place in the display beside Oliver Cromwell's christening robe. Here then that historic cradle which ended so tragically for the monarch is made to symbolize the transitory nature of human passions and, transformed, serves the charitable purposes of to-day. Napoleon, too, will be represented, not in a manifestation of childish desire but rather in evidence of that other love which great and lowly have in common, and which is, of course, as old as childhood is. The present given by the Emperor Napoleon to his infant son, the King of Rome, has been obtained as a gift from the Empress. Forambulators and cradles also such objects of childhood that flourished in the seventeenth century, have been collected to augment the display. Children's furniture from the sixteenth to the nineteenth centuries will be shown, as well as a display of British and foreign children's clothes, hats, shoes and gloves of the same period, early games, cards and jigsaw puzzles, playbooks and lesson books. A series of rooms is being arranged to depict child scenes of bygone days with inevitable such figures as Madame Tussaud tradition. There will be portrayed in similar fashion a Kate Greenaway scene, a Victorian Sunday, the ancient nanny and the modern nurse.

The British royal family, as usual where charity is the object, is accordingly wholehearted support to the exhibition. Queen Mary is contributing playthings of her own childhood, and toys which enthralled the young Prince of Wales, his brothers and sisters. Two gold rattles given by Queen Victoria to the Prince and Wales and such objects of childhood that interest will attach to an exhibit of the immature efforts of the Prince and his brother, the Duke of York, as artists. It is said these efforts are just as atrocious in result and effect as any of less talented youths.

Perhaps one of the most interesting of the relics to be exhibited, however, has no connection whatever with the childhood of the great or the near-great. It is a pretty feeding bottle, believed to date back to about 1750. It was discovered in possession of a farmer who was using it to feed his lambs. Probably no more fitting place could be found for this memento of a bygone period and a long-forgotten childhood than alongside the relics of royal youth and palace playrooms. It is a striking reminder of that strange democracy of the very young, that constant symbol of the "great levelers"—childhood and death—and it is to be hoped that as such, in these transitional days, it will be interpreted by those privileged to patronize the exhibition.

There is a timely moral lesson, too, in the story recently told by one of the better known financial journals. It happened that a shabbily dressed, elderly woman entered the classic portals of a large up-town bank in New York, and told the uniformed guard she desired to open an account. She was shown to the new account department where three officers of the bank were more intent upon the approaching lunch hour than upon new business, particularly business which came in such inconspicuous garb. As it happened, lunch was over, and the woman was left to the manager.

After stating her mission, the old lady asked to see a statement of the bank's financial position, much to the surprise of the manager who was accustomed to having the institution's financial status taken for granted, particularly by the bank's more important clients. The manager, after a moment's statement, answered courteously some startlingly intelligent and pertinent questions, which satisfactorily received, brought the intimation the lady wished to open an account. She gave her name and other necessary information, and casually, for he expected a small initial sum, he asked: "How much do you wish to deposit?"

"Thirty-one thousand dollars," replied the old lady, equally casually, as she proceeded to count out the money in bills of various denominations.

### Harry Lauder's New Mansion

Lauder Hall, Sir Harry Lauder's new mansion at Strathaven, Scotland, is receiving its finishing touches, and will be ready for occupancy in a few weeks. He had given the planning his close attention, and the building contains many historic as well as unique features.

While excavating for a new building in Kustendil, Bulgaria, workmen recently found an aqueduct in which the top-pipe sections could be removed for cleaning.

Among men the safest auto driving ages are between 20 and 30, and among women, between 20 and 40, according to statistics recently compiled in England.

### Weary Days—Sleepless Nights

### Wreck the Nervous System

Men and women toss night after night on sleepless beds. Their eyes do not close in the refreshing sleep that comes to those whose nerves are right. They are irritable and nervous, weak and worn out, and everything looks dark and gloomy.

Milburn's N. & N. Pills is the remedy that is required to restore them the blessing of good health. They bring back the sound refreshing sleep, tone up the nerves, and impart that sense of buoyancy to the spirit that is the result of renewed mental and physical vigor.

### Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

#### NO. 6—ASTIGMATISM

We now come to a very common defect of the eye, one little understood by the public many of whom consider it a viable inflammatory condition or disease or that it is a temporary ailment, which is not so.

The simplest explanation of Astigmatism would be to describe it as eyeball in which one or both refractive surfaces (Lens and Cornea) are not symmetrically curved. Try and visualize a perfectly round ball of glass from which you cut a slice. Now the Cornea of the eye should be as equally curved in all meridians as that slice of glass and when it is not, the condition is known as Astigmatism. It is usually congenital but may be acquired by a blow or result from a scar after an ulcer has healed. It is also considered probable that many cases of Astigmatism have resulted from undue pressure on the eyeball in infancy by the parent wadding the child's eyes, also by the children rubbing their eyes in the horizontal direction in their "crying" years as it is usually in the horizontal direction that Astigmatism exists. An unsymmetrical (not uniformly curved) Lens is usually due to the muscles forcing it to assume a shape which will, as near as possible, effect or neutralize the mal-formed Cornea, in the interests of good vision.

We have seen that rays of light from any object to be seen clearly and comfortably, must focus on the Retina, and to do so must pass through symmetrically curved surfaces which you see is impossible where Astigmatism exists because the focus is a blurred line instead of a sharp point. The poor vision which would result from Astigmatism of moderate amount is often overcome by the above action of the Lens. The third motor nerve sends power to the Ciliary muscle (which controls the action of the Lens) and the Lens is forced into an unnatural shape in the effort to obtain a clear brain image. But imagine, if you can, the excessive amount of nerve energy used up by such eyes for any sixteen hours daily year after year. Is it any wonder such people eventually break down under the strain?

Some symptoms of Astigmatism are headaches, nervousness, irritability, loss of "pep", lifting of the head to see better, nausea, indigestion, chronic constipation and even St. Vitus' Dance. Different individuals are differently affected. The symptoms occurring in an individual

depend upon the age, temperament, physique and occupation. Strange as it may seem the discomfort experienced as a result of Astigmatism is not at all in proportion to the amount of error. In fact it usually bears the reverse ratio as we find the better the vision the greater the eyestrain where a small amount of error exists. It is estimated that normal eyes use about thirty-five per cent. of the nerve energy of a normal body. How much is used by eyes that are abnormal? Could a body remain healthy under such circumstances? You answer.

We have no more reason to expect the eyes to be perfect than the features or any other organ. Neither are they so and few eyes are without some degree of Astigmatism. A small amount can be tolerated by many without discomfort especially in outdoor occupations, but the present age of excessive close work, study, reading for pleasure, strong electric light, moving pictures and "glare" from almost everything we look at, tend to manifest the defects in the human eye. It is doubtful if our forefathers' eyes were any better than theirs, but they lived differently, they lived differently at different times, retired earlier, had plenty of soothing green grass and trees to break their gaze instead of the reflections from city pavements and roads, auto radiators, store windows. What artificial light they used was coal oil or gas, not electricity which is charged with rays harmful to the eyes.

Am I advocating a return to the old condition of things? By no means. I am merely pointing out what "good" conditions and many ailments remote from, yet due to eye conditions, is part of the price we are paying for advancing civilization. It has taken quite a time for me to tell you the worst. Now comes much better news. Science has again come to our aid in the form of instruments, in the hands of a skillful optometrist, measures the amount and kind of Astigmatism and other eye defects—also machinery for grinding special lenses which when worn entirely neutralizes the effects of the abnormal conditions with resultant normal vision, normal amount of nerve energy used for the eyes leaving the other organs with their proper share. The unpleasant eye and bodily symptoms disappear, work is more efficient and life is enjoyed instead of tolerated. (To Be Continued)

### Strange Accidents At Sea

Ships' Officers Give Accounts Of Two Unusual Collisions

Recalling strange accidents at sea, officers of the steamer Beechpark, at Saint John, gave first-hand accounts of two unusual collisions.

Chief Engineer David Thomson was with the Vindicator, which ship carried troops across the English Channel in war days. Traveling without lights, troop-carriers proceeded at full speed over courses ordered clear by the admiralty. A stocky trawler returning from the coast, with the Vindicator, was ordered clear by the admiralty and unwittingly crashed the troopship's track.

"It was the first time an iron ship was cut in two," said Thomson. "We struck the big trawler broadside, plowed right through the hull and out the other side. Five minutes later we saw a floating piece of the stern half sinking."

Only five of the crew of 39 were rescued, and one died soon after. "The confused survivors wouldn't believe it," he said, "but I understand why we had not foundered also."

Capt. Will Masson told how the steamer Montpark, a famous Q-boat during the war, met a strange end while under his command in 1919. A crash occurred while the Montpark was feeling its way through poor visibility one night a few days out from the Type month. Capt. Masson saw the bow of another ship protruding into his own, heard terse orders in a foreign language, and watched the unknown vessel back away into the mist.

The Montpark sinking, its crew jumped into the sea. Capt. Masson and a few seamen were rescued from a life-raft the following evening, but other members of the crew were never found and the ship which left them helpless was never identified.

### High Broadcasting Station

To spread Hungarian culture throughout the world and make it possible for nationals residing in other countries to keep in easy contact with the fatherland, Hungary will erect the highest radio broadcasting station in the world. It will be on an island south of Budapest. A trellis tower steel tower will rise 932 feet, and a telescopic shaft on top will make the total height 1,022 feet.

Traffic in titles has been made illegal in Germany.

### Progress For Persia

Mechanization Of Old Handicraft Industries Looks Like Mistake

And now the Shah of Persia has evolved a five-year plan! Progress is to make its debut through the mechanization of the ancient handicraft industries that have created so many delights for collectors. Great carpet and rug factories will rear their heads where peasant hands have labored after the traditions and the patterns of the centuries.

Gone will be the features that made oriental rug collecting a delight to those with incomes permitting. No longer will variations in color tell of the exhaustion of some native dye mixture, or irregularities in pattern betray the advent of a new native weaver. The innovations that began with aniline dyes and chemical washes will reach their climax in a uniformity that matches the best of the synthetic.

Indeed, progress in Persia may mean no progress at all. Who will have a genuine oriental rug if it differs not a whit from the mechanized product of the occident?

### British Flight Squadron

Suggestion Is Made That A Visit To Canada Should Be Made In The Near Future

A suggestion was made in the British House of Commons that the United Kingdom send to Canada detachments or flights of airplanes to "show the flag" in the Dominion. The planes would be sent aboard a naval aircraft carrier.

The motion of the proposal arose during the debate on the air estimates when Oliver E. Simmonds, Daddington Conservative and aircraft manufacturer, told the house Canada had never seen a squadron of British planes, although every squadron of machines from the United States made exhibition flights to Canadian air pageants.

Mr. Simmonds said he was in Ottawa early this year and heard how expressed that the Royal Air Force would "show the flag" in Canada. He asked that the air ministry consider the matter.

Sir Philip Sassoon, minister for air, described the suggestion as "very interesting."

### Passenger Train Pooling

Expected To Effect Big Saving Under Arrangement

The passenger train pooling arranged for in the Montreal-Toronto, Ottawa-Toronto and Montreal-Quebec services, as extended and effective from March 11, will produce a saving of approximately 1,000,000 train miles per annum, divided about evenly between the C.N.R. and C.P.R. and on the basis of a conservative estimate will represent a saving to each company of approximately \$500,000 per annum. This information was given in the House of Commons by Hon. R. J. Manion, minister of railways and canals, based on a telegram from Chairman C. F. Fullerton, of the C.N.R. board of trustees.

We're shipping socially, says the Brandon Sun. We sent 62 Christmas cards and only received 41.

### New Television Machine

Will Be Ready For Demonstration At Chicago Show

The world's largest television machine, being built at the Horton Street Works, Fort Erie, N.Y., will be ready for demonstrations at the re-opening of the Century of Progress Exhibition at Chicago on May 1. The builder of the machine, U. A. Sanabria, of Chicago, said the machine would have a 30-foot screen and its transmitter would weigh more than 5,000 pounds. It would have a definition sufficiently large to handle an entire scene at one time.

### London Consumes Less Meat

Dieting and slimming by women and girls, popularity of canned goods with week-enders and unemployment are given as reasons London consumed 10,000 tons less of meat during 1933 than in 1932.

## Town & District

W. Oiler of Queenstown was a visitor in town last Thursday.

Miss Ruth Northcott of Mile was a guest at the Manse this week end.

Norman Idell and Tom Williams of Arrowood spent some hours in town Saturday on business.

I. Gove and Wm. Schmidt attended the lectures given by the Precision Machine Foundry Co. in Calgary last week.

A number of friends of Eli Woods honored him on his birthday with a surprise party. The evening was spent playing cards.

W. Cook had the misfortune to spill some boiling water on his foot last week. He has been confined to his home since and is slowly recovering.

A hockey banquet will be put on in the hall, Friday April 13. Honor will be done to the Gannery by the townspeople.

The annual Gleichen Fire Brigade Ball will take place next Monday evening in the Gleichen Community Hall. Again the brigade boys declare a joyous time will be the order of the evening. The Ladies Orchestra will supply the music.

At the meeting of the Boy Scouts, March 22nd 21 boys were present. The first night of inspection was held and all the boys were spick and span. The lecture given by Mr. Gooderman on "Care of Animals and how to Handle Horses" was enjoyed very much and the Boy Scouts wish to thank Mr. Gooderman for going to their meeting. Each of the patrols received a point this week. The standing to date is as follows: Crows 13, Pigeons 10, Fox 9, Owls 9. Most of the boys are receiving their St. John's ambulance badge books.

The Queenstown members of the Gleichen Branch of the B. E. S. L. are putting on a big dance in the hall there, April 11th. Many people will attend and the members state a grand time is assured all.

Miss Jean Cook, the popular teacher on the Gleichen public school staff has been confined to her bed for the past three weeks with pneumonia. Miss Cook is now recovering.

Mayor Yates has received word that his father is very ill at the coast.

Bill Schmidt has got a handle to his name now, he also has a diploma to prove it. Henceforth the proper way to address him is "Dr. Spark Plug."

J. Hewatson of Stobart writes The Call as follows: "I should like to ask a question through your paper as to why it is no report of the school board meeting held on March 8th, ever appeared in The Call?"

The Gleichen and District Young People's Society will hold a bridge and whist drive in the Oddfellows hall on Wednesday, April 4th, beginning at 8:30 p.m. Prizes will be awarded the winners. Tickets are now being sold in advance by members of the club at 25c. All young and old, town and country, are most cordially invited. Fathers and mothers are invited to spend an evening with their grown sons and daughters. A good time is assured to all.

Monday evening last many friends of Robert Cardinal, cm, popular bank teller, gathered above the bank for a farewell social in his honor. Bob is well, being transferred to Coleman. Among the invited guests were: Miss A. Forgie, Mr. J. Harrison, Miss I. Hunter, Mr. Arthur Clifford, Miss N. Downey, Mr. Gerald Yates, Miss K. Beach, Mr. J. Cook, Miss M. Desjardine, Mr. C. Walls, Mr. M. Yates, Miss M. Young.

L. Woods, editor, news reporter, sports writer, ad hunter, circulation manager, foreman, pressman, printer, financial agent, proof reader, collector of bills, bookkeeper, job printer, superintendent, mechanical engineer, linotype operator, etc., in fact the whole staff of Drumheller Review arrived home on a visit, to his parents, in the early hours of Saturday morning. After looking the town over for a couple of days and paying the entire staff of The Call a visit Monday morning, left late that afternoon for the coal city.

## The Gleichen Flour Mill

If there is anything better than Beau Ideal Flour, it's more Beau Ideal Flour.

If you are not using it get some.

If you are using it get more. By all means get the Beau Ideal habit.

It is not a bad one, and it will save you money.

There is a good stock on hand at the Gleichen Flour Mill.
